

SUMMARY

Junior Web Developer with experience in building projects using PHP and Dart. Skilled in creating simple backend systems with PHP and developing user interfaces using Dart (Flutter). Has teaching experience in HTML and CSS at a local school, reflecting strong communication and technical skills. Eager to learn and contribute to modern web development teams.

EXPERIENCE

04/2025 - 04/2025	Freelacer Make an inventory web Built a web-based inventory system with a clean interface and real-time data access. Handled both frontend and backend, and worked with the team to meet business needs. Improved stock tracking efficiency and reduced manual errors. Ensured data security and system reliability. Collaborated closely with users to tailor features effectively.
11/2024 - 11/2024	Trainer AI - Mahad ↗ Delivered a one-week HTML and CSS training for high school students, focusing on basic web development and front-end skills. Provided clear lessons and guided students through simple hands-on projects. Encouraged practical learning to help students understand core concepts. Adapted teaching methods to different learning styles. Fostered a supportive and interactive learning environment. Received positive feedback from students and school staff.

EDUCATION

07/2024 - Present	Software Engineer IDN Polytechnic
07/2021 - 05/2024	IPA PKBM AI-Mustajab
